

MULLAPUDI SAI NIKHIL

📍 Bhimavaram, Andhra Pradesh ✉️ sainikhilmullapudi1604@gmail.com ☎️ +91-7093647471  [LinkedIn](#)  [Github](#)

PROFESSIONAL SUMMARY

AI & Data Science undergraduate with hands-on experience in MERN stack development, and LangGraph-based agent workflows. Proven through full stack internships and projects spanning real-time civic platforms, multi-agent AI pipelines, and scalable backend systems - with a strong focus on clean architecture, modular UI design and development.

EDUCATION

B.Tech in Artificial Intelligence & Data Science	2023 – 2027
SRKR Engineering College, Bhimavaram	CGPA: 9.35 / 10.0
Higher Secondary Education (Class XI–XII)	2021 – 2023
Bharatiya Vidya Bhavan's	Percentage: 90.4%

EXPERIENCE

Full-stack Developer Intern Bellcorp Studio	<i>May 2026 – Present</i>
<i>React, JavaScript, TypeScript, TailwindCSS, Radix UI, Zod</i>	
- Built supplier onboarding platform — 25+ multi-step form screens, role-based routing, and Zod-validated flows with a modular, component-driven structure. - Developed seller dashboard covering inventory, orders, returns, and factories; used TanStack Table for data-heavy views and ExcelJS for bulk product uploads. - Maintained shared Radix UI component system across both platforms to keep design consistent and components reusable.	
Frontend Developer Intern HealToFit	<i>April 2025 – Sept 2025</i>
<i>HTML, SCSS, JS, Node.js</i>	
- Developed and optimized recipe template modules with form validation and verification workflows for a healthcare platform connecting users with health coaches and Ayurvedic experts. - Collaborated on a performance-focused frontend codebase, improving component reusability and reducing UI inconsistencies across modules.	

PROJECTS

Voice2Action — Civic Issue Reporting Platform	 GitHub
<i>Node.js, React, Socket.io, Twilio API, MongoDB</i>	
- Built a multi-modal civic reporting system supporting voice, text, and media submissions with GPS tagging and real-time issue tracking via Socket.io. - Developed admin dashboards for issue verification and analytics, with instant SMS/email alerts using Twilio API to streamline civic coordination.	
Telemedicine Chatbot + Appointment Booking System	 GitHub
<i>React, Express, Node.js, MongoDB, Nodemailer, Twilio, Gemini API</i>	
- Created a web-based chatbot for real-time medical consultation, health advice, and appointment scheduling. - Designed an integrated system for scheduling and managing doctor appointments.	
NEXUS.AI — Multi-Agent System	 GitHub
<i>LangGraph, Claude API, OPEN AI API</i>	
- Collaborated in a team-built multi-agent AI system; owned the LangGraph agent workflow design and orchestration logic for automated query handling and task routing. - Multi-agent orchestrated system focusing on backend code generation, performing security audits, refactoring, and deployment to Render.	

TECHNICAL SKILLS

Languages	C, C++, JavaScript (ES6+), TypeScript, Python(basics)
Frontend	React.js, Zustand, HTML5, CSS3, TailwindCSS, SCSS, BootStrap
Backend	Node.js, Express.js, RESTful APIs, Authentication
Databases	MongoDB, MySQL
AI / ML	LangGraph, Agentic AI, NumPy, Pandas
Tools	Docker, Git, GitHub, Postman, NodeMailer, VS Code

ACHIEVEMENTS

- Best Idea Award** - (Nexus AI Hackathon - 2026) — Multi-agent system with LangGraph-based workflow orchestration.
- 3rd Place** - (DevOps Flowthon - 2025) — Recipe Sharing Platform with full CI/CD pipeline integration.
